Tiles

Flooring the extensions of your dream space, tiles from Sunhearrt are a great addition to every ambience. With their simplistic elegance and finesse, our tiles introduce modernity and grandeur by manufacturing the best alternatives and replacements to natural surfaces. This collection, thence, is the perfect choice for 'architecting' the spectacular!

DESIGN INSPIRATION

From its tall standing mountains and rocks, nature has always been the inspiration behind some of the finest creations on earth. Be it art or architectural surfaces; nature is yet again replicated in Neolith by Sunhearrt. The collection eloquently and elegantly reflects on the beauty, eminence, and strength of its inspirations to craft a truly resilient and timeless series.

So remodel the calm and peacefulness of your favourite spaces by incorporating the earthy tones and soothing shades that create a warm environment. With a range of browns and beiges, you get unique possibilities of palettes that can assist you in creating a nature-friendly atmosphere in your interior decor.

Let the outdoors inside by tying this nature inspired collection and its elements into a reflection of tile series with numerous benefits, enfolding nature and its timelessness in every aspect.

Inspired by the jagged stones and craggy peaks, something that lies idle; uncarved, unwrought, and abiding while the ages just flee, we bring you a collection just so. A collection simply raw, enfolding nature and its beauty, resilient, and truly timeless in every aspect.

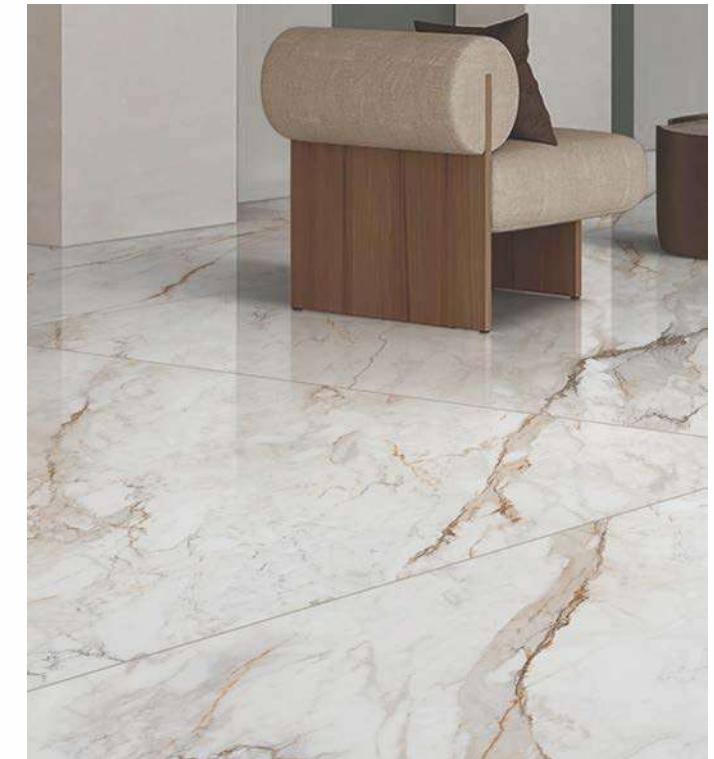

NEOLITH

INTRODUCTION

Sunhearrt presents the aura of nature in your spaces with its novel collection of tiles, that seek design and texture elements from nature. They are made to enhance the opulence of your chosen spaces with their spectacular features and lifestyle-aiding attributes.

NEOLITH COLLECTION
120x180cm – 9mm THICKNESS

NEOLITH

The Neolith Collection is a noteworthy creation of excellent artistry that coalesces the eminence of colossal rocks and the vivacity of ceramics brilliance into exclusive architectural surfaces. Here, the brilliant combination of bolds and neutrals lets you experience the vividness of hues against your chosen backdrops, textures through its surfaces and seamlessness through their massive size.

INNOVATIVE DESIGNS

A special ceramic creation that delivers a contrast of sturdy and durable texture; alongside a genteel feel to your spaces.

ROBUST STRENGTH

Meticulously designed with superior raw materials, the collection is outstandingly sturdy and resilient.

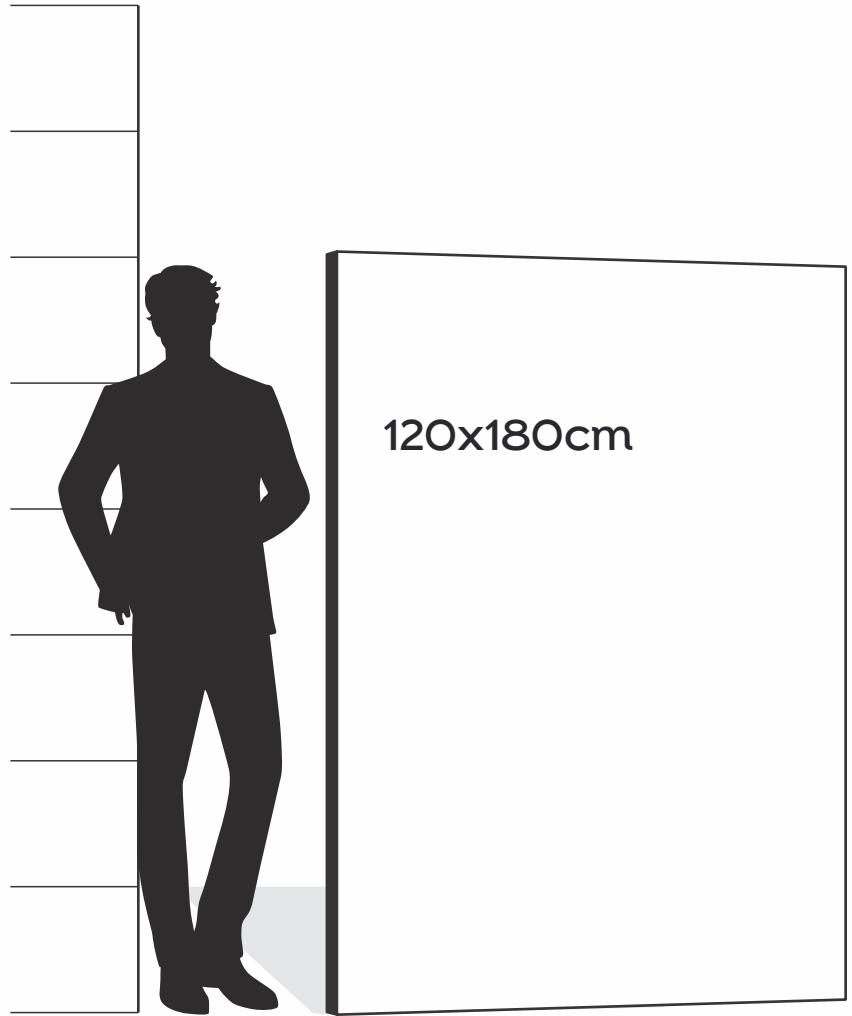

UNMATCHED GRANDEUR

The collection offers a grand size to impart an extravagant ambiance to your spaces; only to achieve an unparalleled luxury.

BACKED BY ADVANCED TECHNOLOGY

Supported by an extensive R&D processes and team; manufactured in the light of superior technology, the collection has been designed to excel in its attributes and style.

SIZE & THICKNESS

ADAPTABLE SIZE

The grand size of the collection is versatile on the contrary and allows one to explore decor ideas and execute them to perfection.

RESOURCEFUL APPLICATION

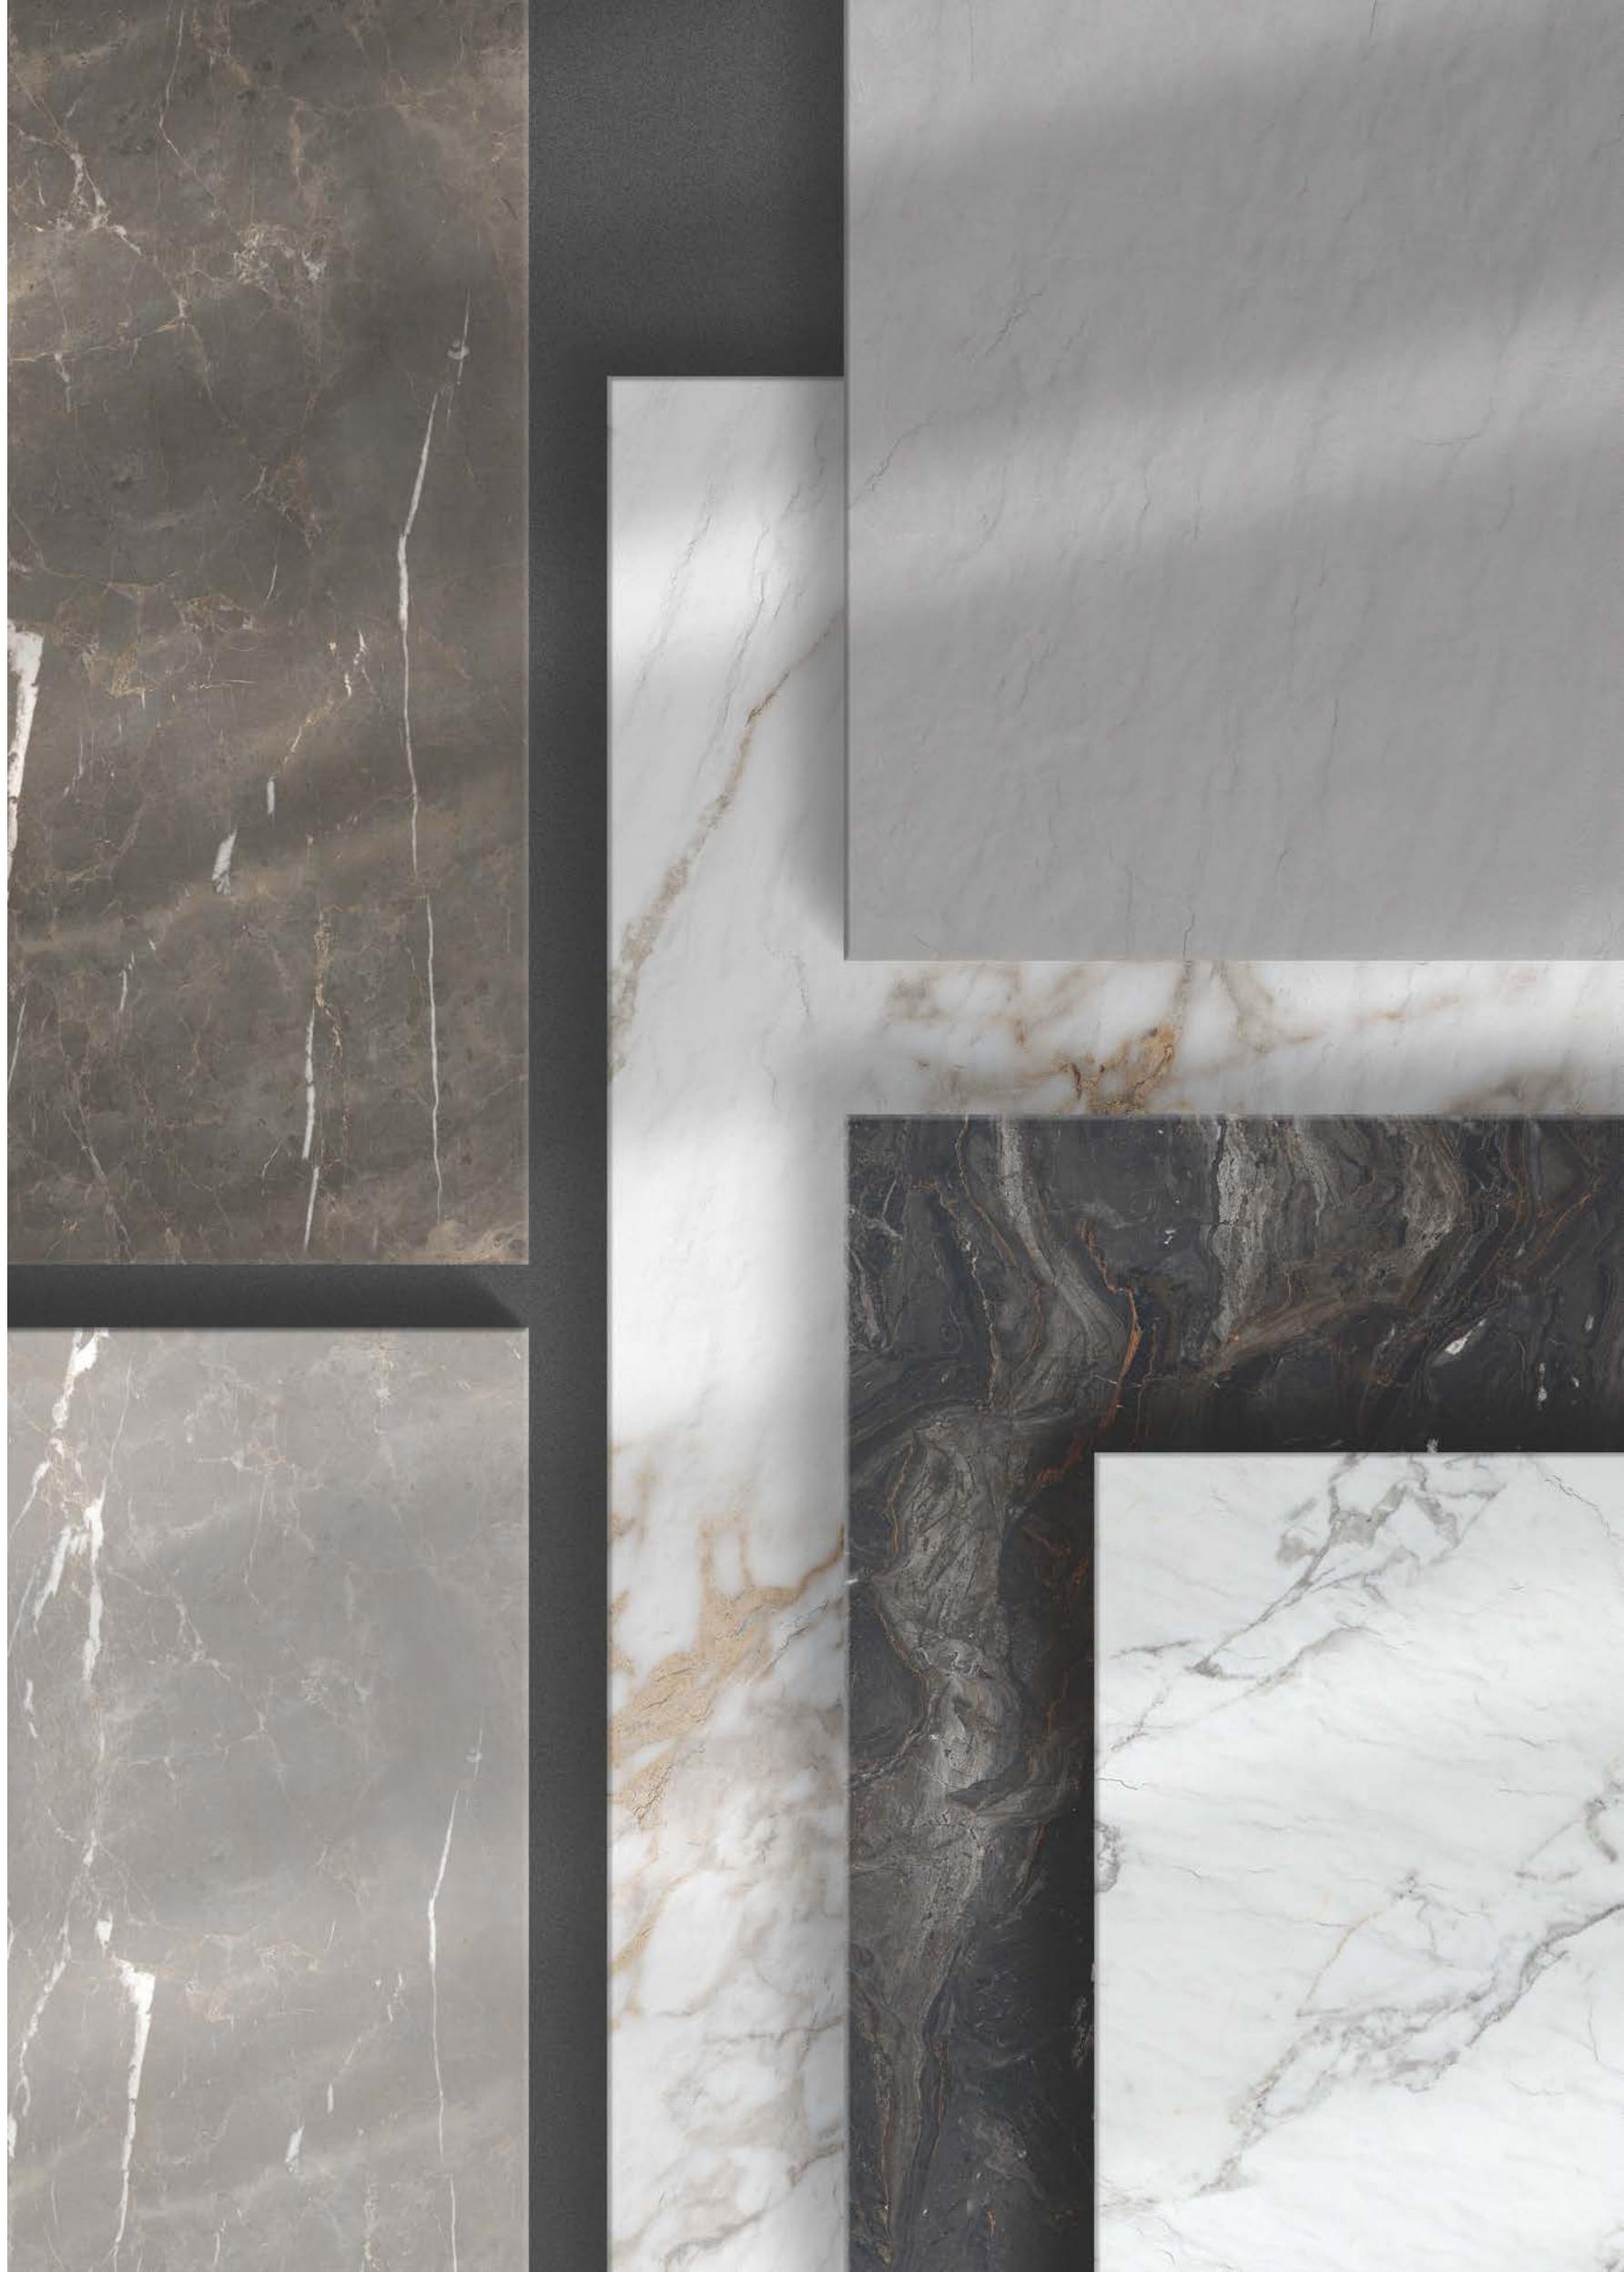

The multifarious size offers versatile application possibilities for your spaces, furniture, and other tiling needs.

EXTENSIVE SIZE LIMITLESS APPLICATIONS

Explore ceaseless opportunities to enable a grand decor style with the extensive 120x10cm size of Neolith, offering spaces a fine aesthetics.

IMPECCABLE LAY

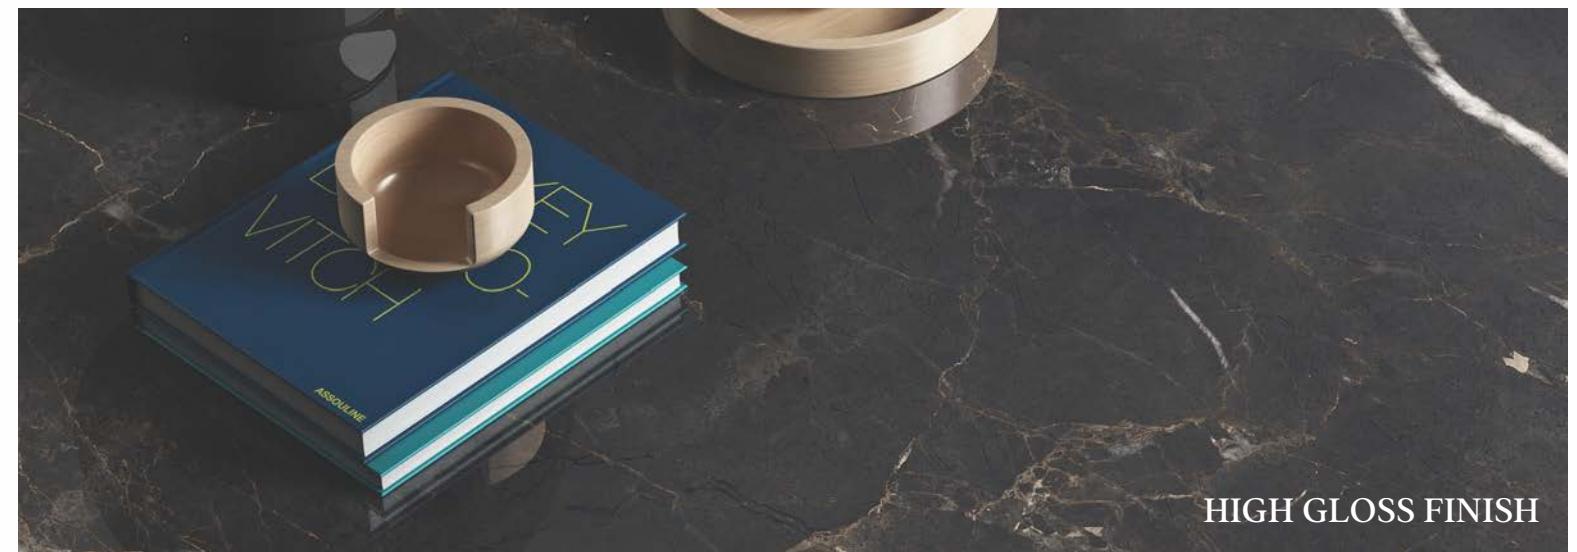

The variable sizes under the collection offers a seamless lay for your select spaces with less unflattering grout lines and facilitating a continuous floor and wall.

FINISHES

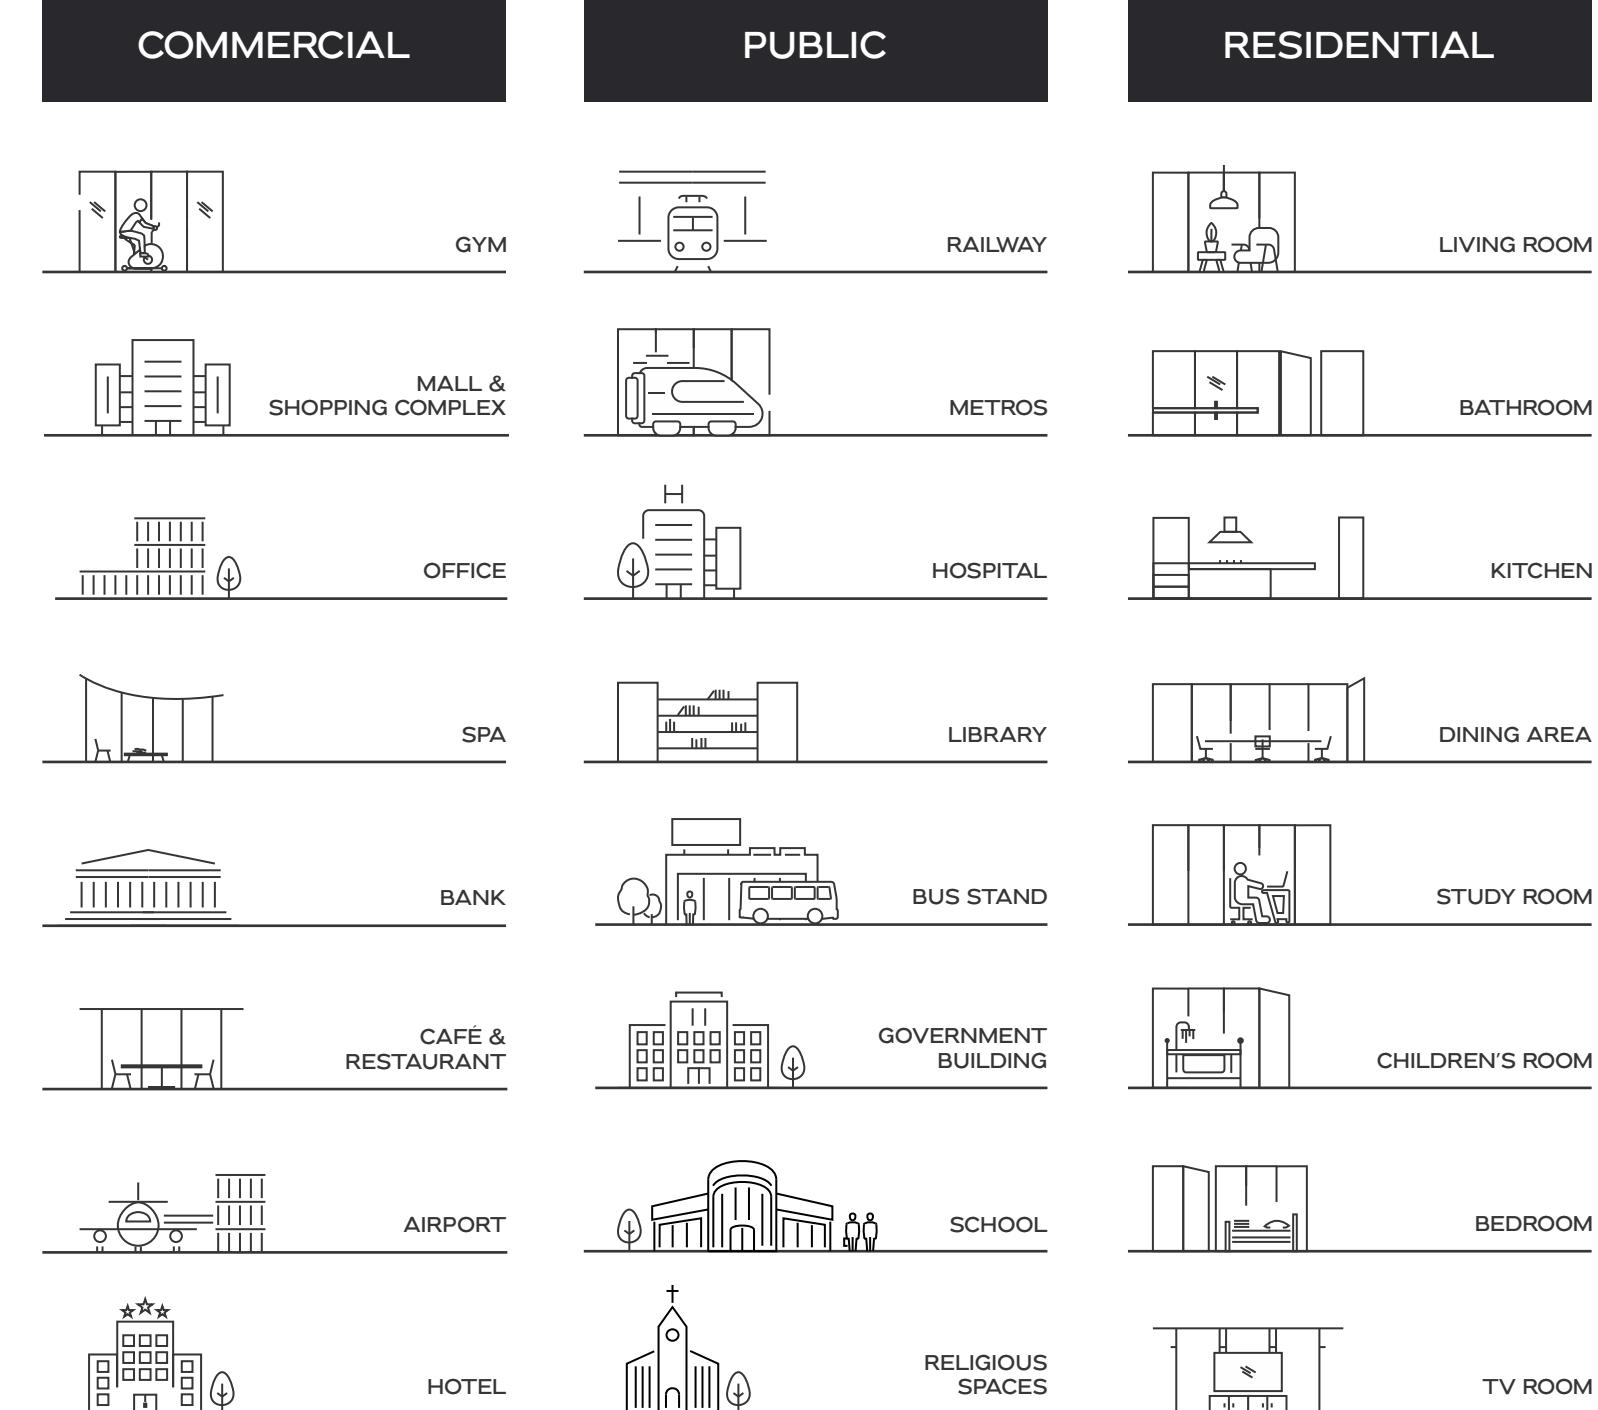

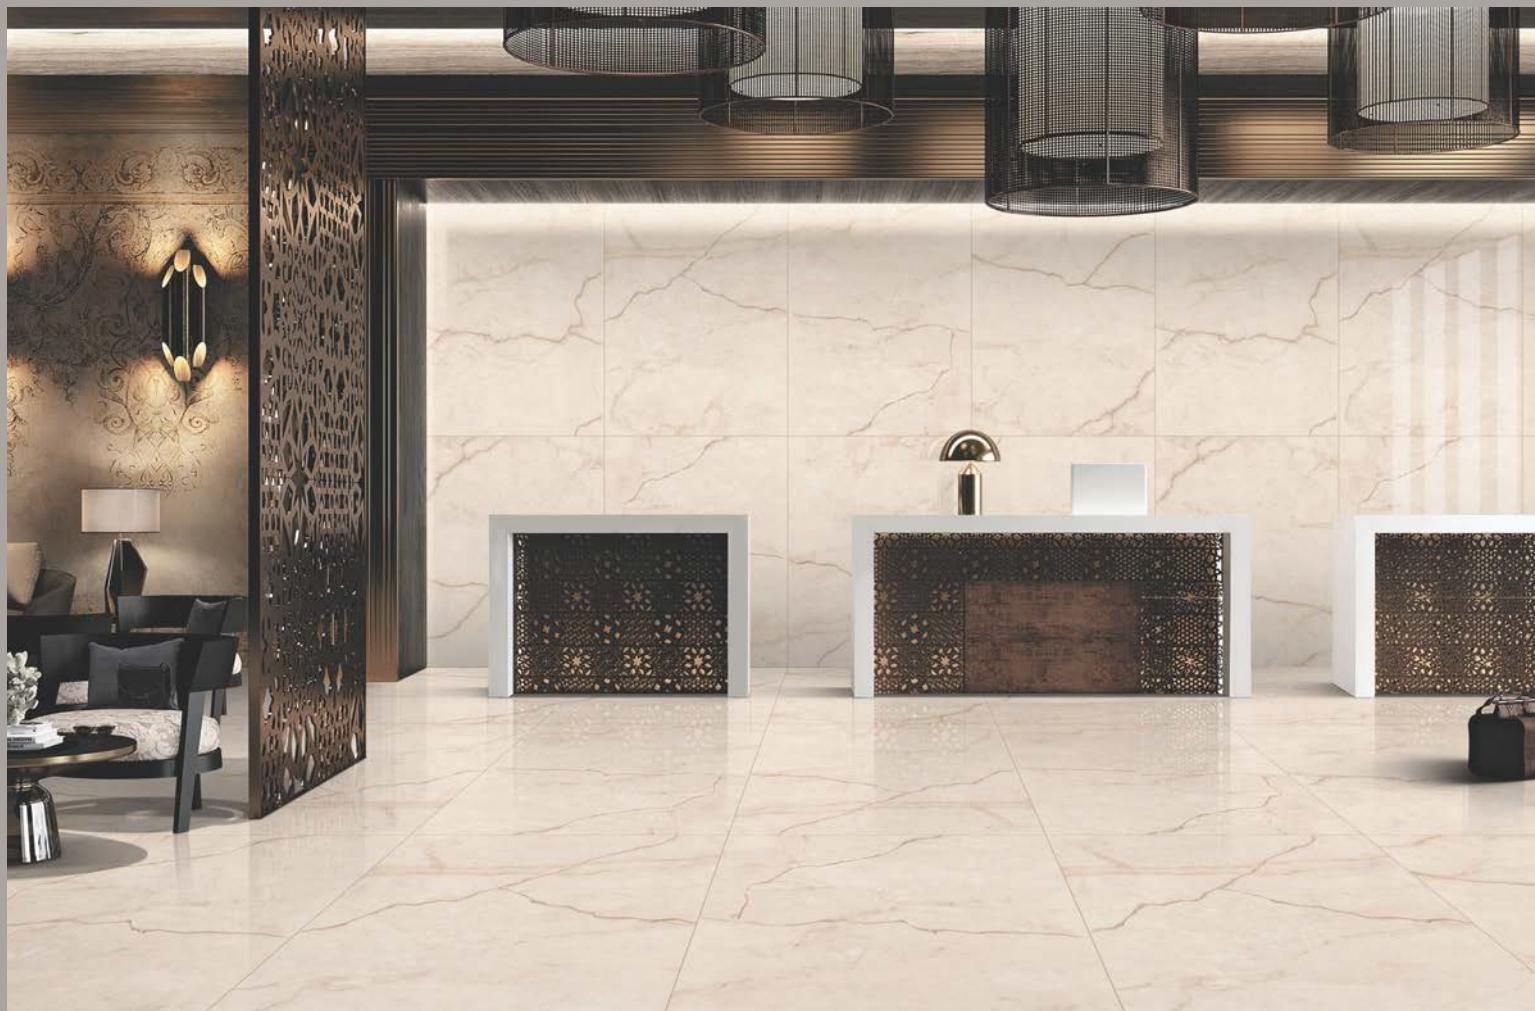

Immerse yourself in the abundance of nature, in all its uniqueness, functionality, and aesthetic finishes; all by Neolith, effortlessly complimenting various interior design choices.

Discover an eclectic melange of surfaces through the versatile range of finishes from Neolith by Sunhearrt Ceramik; with a rather newly introduced Dune finish and other finishes beginning from matt carving, matt, satin matt, glossy, and expanding to high gloss.

APPLICATIONS AREAS

Facilitating extensive use, the collection offers versatile application possibilities. The tiles are perfect for application in all kinds of spaces like a commercial, public, and residential.

SAME DESIGN IN MULTIPLE FINISHES

TRANSPORT SYSTEM

axi marble is extremely heavy and may have sharp edges. It is therefore necessary to wear protective gloves at all times. We recommend the use of single or double suction cups which help to ensure the integrity of the tile is maintained and the operators' safety is not compromised.

Carefully wipe the surface of the tile to remove any dust or moisture, position the suction cups on the face of the tile and make sure that they adhere to the surface properly.

For safe handling of large format slabs on-site we highly recommend the use of a specialist tile handling frame with suction cup for larger formats the full frame with four suction cups is suitable, with smaller formats two double suction cups are sufficient.

FIXING SYSTEM

The growth in popularity of large format tiles, with their increased weight and smoother backs, presents new fixing challenges to the professional tiler.

Correct preparation of the subfloor or laying surface is crucial. The laying surface should be rigid, non-flexing and capable of supporting the expected load with minimal or no deflection. A level subfloor is extremely important in order to keep tiles from cracking. Sanding high spots and the use of a levelling compound on low spots is essential. It is also important that your tiles are clean and dry, if necessary wash them with clean water and dry them thoroughly before fixing.

Whatever your specific requirements, whether they be for standard or large format slabs within internal or external applications, selecting the appropriate cement-based, fibre-reinforced or ready-mixed adhesive is vital to ensuring the success of your project.

Once your subfloor is clean and dry, spread the adhesive on the surface to be covered with a 10x10mm square toothed trowel, covering an area 5-10cm more than the size of the tile. Always apply the adhesive in stripes running parallel with the short edge to remove air pockets and bubbles. By using this method, full coverage of the tile with adhesive is ensured.

HAND CUTTING SYSTEM

CUTTING

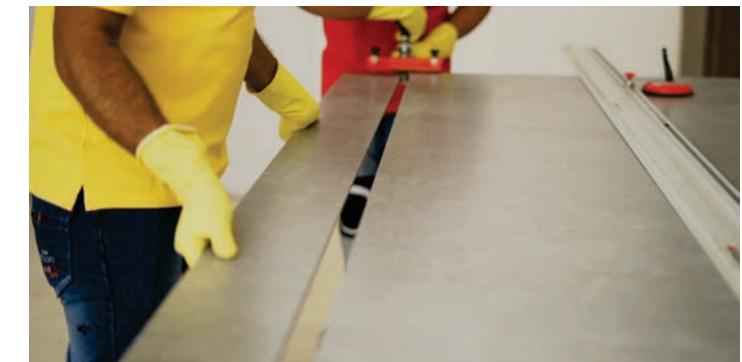

axi marble require high quality diamond blades for cutting; if hiring cutting equipment please ensure this is provided with the appropriate blades. Always cut and fabricate with wet diamond tools and take appropriate measures to provide efficient ventilation in the work area. Always wear approved eye, boot & hand protection when fabricating porcelain.

LINEAR CUTS

For most cuts we recommend the use of a wet saw machine. These are available for cutting lengths of 100 mm up to 2200 mm. The Raimondi Bolt range of bridge wet saw machines are available in various lengths.

For linear cuts of 1500 - 3000 mm we recommend the use of a cutting guide with cutting carriage.

Always use a handling frame with suction cups where necessary. The Raimondi FREE-CUT Cutting System is available for lengths up to 4000 mm.

CUTTING GUIDE WITH CUTTING CARRIAGE

Mark the portion to be removed at the ends of the tile with a pencil. Position the cutting guide with cutting carriage so that the references on the guide coincide with the lines marked on the panel.

Lock the cutting guide with the cutting carriage in place using the suction cups. To guarantee correct scoring, the pressure and movement of the cutting carriage must be

Using the cutting guide, move the panel until scoring line protrudes 5-10cm from work surface.

Release the cutting guide from suction cups and move towards the middle of the panel. Start cutting off process by positioning cutting-off pliers in line with the line scored on the panel. Exert progressive pressure until you notice that cutting off process has begun. Go to the opposite end and position cutting-off pliers in line with line scored on the panel. Exert progressive pressure until you notice the cutting off process has begun. To complete the cutting off process, one or more operators must grip the portion to be removed and exert progressive pressure.

Sharp or rough edges should be smoothed and finished with a diamond buffer or sanding pad.

TECHNICAL SPECIFICATION OF NEOLITH

S.No.	Characteristics	IS 15622:2017 Group Bla	EN 14411:2016 Group Bla	Test method	SUNHEARRT VALUE
A DIMENSION & SURFACE QUALITY					
I	Length & Width	±0.1%	± 0.6%	ISO 10545-2	± 0.1%
